Our Company

Our specialty is copper bus bar.

With locations in the US and Mexico and over our 45+ years of business, we have been servicing several OEM markets such as the copier, telex, computer, telecommunication, tier one government contractor, and industrial battery markets.

SPF Advantage

Quality precision fabricated products from the heart.

- Our vertical integration, including in house plating and painting, allows us to be self-reliant, allowing you to have peace of mind over the entire production process,
- We are in this business because we enjoy it!
- Our customers are our top priority.
- Employees are our greatest asset.
- Our customer service is unparalleled.
- Our equipment is well maintained, effective, precise, and safe for our employees.
- Our lean workforce produces quality parts with minimal waste and cost.
- Our locations provide opportunity for our customers on both sides of the border.
- Our ability to engineer and create tools, from custom die forms to stamping and machining, ensures we can handle any request.

Our Company

Our Vision is Customer Focused Fabrication

Our company's key strength is its focus on the customer. SPF America has been built on the philosophy that if we put our customers' needs first, then the needs of our business will take care of themselves. Customer service, product quality, and competitive pricing are what drive customer desire to do business with us. This customer focus has led us to vertical integration.

Any metal fabrication job your company would prefer to move off site for reasons of space, capacity, capability, or cost can be done by SPF America at highly competitive rates.

Choosing SPF means the precision part you need arrives quickly, functions perfectly, and was manufactured completely in house by a company with experience and capabilities you can rely on.

Our Mission

We are a dedicated team focused on fabricating quality precision products meeting the needs of our target customers. We lead our industry in quality, cost, and service.

We recognize success and profitability comes through individual and group achievements in an environment of growth innovation, initiative, integrity, and trust.

We continually seek new business partnerships that utilize and strengthen our competitive advantage.

Vertical Integration

Our vertical integration ensures lower lead times, higher production value, and the reassurance that you'll never have to go through a 4th party.

To us, vertical integration means:

- excellent customer service
- expert team
- precision quality
- short lead time
- fully in-house
- competitive price

Although we specialize in copper, we offer several materials and engineering services for our customers products.

Our high production value comes from our capabilities of cutting, punching, bending, forming, soldering, machining, welding, electroplating, powder coatings, assembly, and quality assurance.
