

SOLUTION BRIEF

BETTER PRODUCTIVITY FOR CUSTOMERS. SALES MOMENTUM FOR YOU.

5G Connected Laptops powered by Intel vPro® and T-Mobile for Business.

WORK DOESN'T LOOK THE SAME AS IT USED TO.

But whether your customers work from the home office, on the road, or in the field, they deserve coverage that keeps business moving. Not only can public Wi-Fi be spotty, but it also offers unpredictable security, ultimately creating risk and hindering productivity.

Together, Intel vPro and T-Mobile for Business have a solution that's raising the bar for hybrid workers: 5G Connected Laptops.

From advanced performance and enhanced security to streamlined management and trusted reliability, our Connected Laptops are at the forefront of technology.

HOW 5G CONNECTED LAPTOPS EMPOWER BETTER BUSINESS

A Connected Laptop features built-in wireless connectivity, eliminating the need for Wi-Fi or hotspots.

Equipped with Intel vPro and connected by T-Mobile for Business, our 5G Connected Laptops enable customers to stay productive with America's largest and fastest 5G network. This combination provides the ultimate workspace portability with readily available connectivity across the nationwide T-Mobile for Business network—which means less dependency on unsecured public Wi-Fi.

MEET INTEL VPRO

Powered by the 13th Gen Intel® Core™ processor, Intel vPro provides industry-leading performance tuned for the workloads and applications you use the most, with hardware-based security right out of the box and built-in tools that extend the reach of IT virtually anywhere.

Paired with the T-Mobile for Business 5G network, it makes our Connected Laptops a winning combination of security and speed—where work happens.

WHAT'S IN IT FOR YOU?

Grow your pipeline and drive customer retention with a competitive new offering that solves a stubborn problem

Meet customers where they are with a solution that empowers hybrid work environments

Identify new opportunities with partner teaming and sales support from the T-Mobile for Business Partner Program

Offer an all-in-one package for your customers with robust security features and reliable nationwide device connections

Simplify sales by working with a single provider

WHAT'S IN IT FOR YOUR CUSTOMERS?

Save money and simplify billings with user-friendly rate plans and the option of unlimited data from T-Mobile for Business

Deliver seamless high-performance computing powered by America's largest and fastest 5G network: T-Mobile for Business

Better protect against the latest cybersecurity threats with Intel's vPro hardware-based security capabilities

Simplify support and reduce employee disruptions with complete modern management

Work confidently from virtually anywhere

SO, WHO ARE THE BEST CUSTOMER TARGETS FOR CONNECTED LAPTOPS?

Field technicians

who manage projects in remote and often isolated locations with limited or no Wi-Fi require reliable connections to perform their jobs efficiently.

Frontline workers

need seamless secure connectivity when away from their assigned desks, such as when working from vehicles or visiting local facilities.

Mobile workers

who spend their days in the field or at off-site locations—such as airports, on the road, or at other public spaces—require secure connectivity to maintain productivity where they do business.

Hybrid/remote employees

who work from home or at community workspaces need dedicated bandwidth and constant connectivity to maximize productivity and remain secure.

THE BOTTOM LINE

Helping to enable your customers' hybrid workforces can present many challenges. 5G Connected Laptops equipped with Intel vPro and connected by T-Mobile for Business help you overcome productivity, security, and employee optimization challenges through fast, secure connectivity where it counts. And with the T-Mobile for Business Partner Program by your side, you're ready to transform customer businesses—while you maximize your returns.

Speak with a representative to find out how you can start selling our 5G Connected Laptops to help your customers securely work from virtually anywhere.
